DETAILED ACTION

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

This application is drawn to the various protection methods for detecting the trueness of a recording medium. The difference between each group is further defined below:

Group I, claim(s) 1-7, drawn to an assuring the trueness of a title by embedding electronic watermark information in data of the video content.

Group II, claim(s) 8-40, drawn to medium identification information uniquely identifying each of the recording mediums and having a revocation list designating recording mediums to be revoked with at least the medium identification information.

Group III, claim(s) 41-50, drawn to signature data with which a reproducing operation of a device that has a predetermined mechanism is restricted until a calendar designated by a copyright supervisor.

The inventions listed as Groups I to III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: As discussed above.
